Allowable Subject Matter

- 1. Claims 1, 3-5, 7-10 and 12-15 are allowable over prior art.
- 2. The following is an Examiner's statement of reasons for the indication of allowable subject matter based on the Amendment (paper #13) filed on February 4, 2004:

As in claims 1, 7 and 12, the prior art of record fails to teach or fairly suggest a controller for controlling interruption and restarting of data writing to a recording medium having the following features:

(a) a clock generator generates a first system clock in accordance with the decoding of the decoder, generates a second system clock based on a reference clock having a predetermined frequency, suspends providing the first system clock to the encoder until the decoding catches up with the encoding when the decoding of the decoder is delayed from the encoding of the encoder, provides the first system clock to the encoder during a period in which the encoding of the encoder and the decoding of the decoder are synchronized, and provides the second system clock to the encoder from when the decoding of the decoder and the encoding of the encoder reach the data at which data recording was interrupted.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious

over, the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Arataki et al. (5,831,955) is pertinent because Arataki teaches an information recording/reproducing operation in response to first/second clocks.
